

NEXUSLINK'S WB-1750-KIT

WIRELESS GAMING BRIDGE

YOUR PERSONAL POINT-TO-POINT WIRELESS CONNECTION

Wireless Gaming Reinvented

When it comes to gaming, *almost* is never good enough. That's why the revolutionary WB-1750-KIT is the ideal choice for gamers currently using wireless. Unlike traditional wireless, which spreads a weakening wireless signal as it covers distance throughout the home, the WB-1750-KIT delivers a concentrated private point-to-point connection directly to the gaming device.

The WB-1750-KIT has a wealth of features developed exclusively for gaming including advanced technologies like smart channel switching schemes, gaming centric QoS, MU-MIMO and more. These gaming-specific abilities protect gaming performance and optimize network performance by ensuring low latency, expansive range, steadfast error tolerance, and agile adaptability to changing environments.

FAST & EASY INSTALLATION

Within minutes, experience premium gaming or streaming anywhere in the home.

See How it Works:

Deliver Concentrated Wireless to Hard-To-Reach Rooms

Unlike traditional wireless, the WB-1750-KIT uses Private Point-to-Point LAN to penetrate through walls and other building materials for an optimized connection and improved range.

Advanced Features Minimize Lag, Stabilize Ping & Maximize Network Performance

Unlock your gaming potential with advanced technologies like MU-MIMO for reduced lag and High-Powered AC1750 for increased speeds. All this, delivered over a dedicated 5GHz band for unmatched network performance.

Forget About Traffic On Your Private Gaming Express Lane

Tired of having your gaming experience interrupted by local bandwidth-intensive activities such as streaming? With the Wireless Gaming Bridge, you'll have your own dedicated 5GHz band, effectively eliminating lag and dropped frames caused by other data-hogging devices.

SPECIFICATIONS

Hardware

- 2 Wireless Gaming Bridges
- 2 RJ-45 Gigabit Ethernet Ports
- 2 Reset Buttons
- 2 WPS Buttons
- 4x Internal Mimo Antennas
- 2 Power Switches
- 2 Power Jacks

Standard

- 802.11a/n/ac

Environmental Conditions

- Operating Temperature: 32~104°F (0~40°C)
- Relative Humidity: 5~95% (non-condensing)

Supported Features

- 4 Streams in 4x4 configuration
- Up to 1733Mbps PHY Rate
- Advanced MIMO features STBC and channel state aware link management for sustained link robustness
- Two ARC-based network processors with hardware assist to manage multiple simultaneous 802.11a/n/ac connections
- MU-MIMO supported
- Expanded support for 128 users
- LDPC support

Note: Specifications are subject to change without notice.

WB-1750-KIT

Optimized For Gaming

NexusLink's Wireless Gaming Bridge was purpose-built for the competitive gamer. Utilizing a powerful wireless chipset from Quantenna, a global leader in cutting-edge wireless solutions, combined with a specialized delivery method, gamers will **achieve ethernet stability with the ease of wireless.**
